

The Digitaly Effect at Educational Perspectives, nfp.

Digitary has transformed the way credential evaluation reports are issued at one of the largest credential evaluators in the United States. Ken Warren, President of Educational Perspectives, nfp., explains

"Prior to working with Digitary, Educational Perspectives (EP) relied exclusively on paper-based solutions for the delivery of our completed credential evaluations. The cost of watermarked "safety" paper was excessive and sufficient stock was often difficult to obtain in a timely manner. EP had no control over the security of the information in our evaluations once they left our office, leaving them susceptible to alteration and forgery. Furthermore, we could not tell if our evaluations had actually been received by the intended recipient.

Digitary has resolved all of these issues. Our printing and postage expenses have been greatly reduced, and we can now ensure that all of our evaluations are authentic, tamper evident, and are received by applicants in a timely manner. With Digitary, EP continues to maintain control over the content and validity of the evaluation, while our clients and customers have the added advantage of controlling access to their verified documents. At EP, we can monitor when an evaluation has been received.

The response to Digitary technology from universities has been overwhelmingly positive. EP and Digitary are currently working toward a 'Phase II' project, which will enable delivery of completed evaluations and educational credentials from EP directly to universities."

About Digitary

Digitary enables over 30 Higher Education Institutions in 5 countries to securely certify and deliver certificates, transcripts, credential evaluations and other official documents online. Digitary helps institutions to migrate from paper-based processes, and in doing so reduces administrative costs, improves services levels, and eliminates credential fraud. Digitary customers include the University of Cambridge, London School of Economics, and Australian National University.

Easy On-Boarding

Organisations can start using Digitary to replace paper transcripts within days, while more complex integration aspects can be handled in parallel by integrating with Digitary APIs. Digitary can help institutions to generate fully customised electronic transcripts, degree certificates, and other documents en masse using data from any Student Information System.

Digitary customers include...

Australian National University

UNIVERSITY OF CAMBRIDGE

The University of Manchester
